

THE MAX POTENTIAL DECADE

For a decade now we've seen them come; young folk from Max Potential
At first they dance to the coach's drum their mood is reverential,
Nervous, yes they are a bit, not quite sure what's expected
Wondering just where they'll fit and hoping they're respected.

The coaches too are on their toes they wait with apprehension
Excited by the way it goes; with certain nervous tension,
The Gosford club will host events full six months in the making
As young adults are challenged by this wondrous undertaking.

The object of this special course can simply be explained
By taking willing youngsters who agree that they be trained
To overcome the barriers that dwell within the mind
To cast away the shackles; to leave their doubts behind.

For these will be the leaders who will shape the way we grow
Who will strive to be successful in a way the coach will show,
As they grow into adulthood that success will come their way
And they'll look at Max Potential and the part it came to play.

The RSL at Gosford must be pleased they've been so bold
In funding such a program that is now a decade old,
The community at large will be served by what it's done
With these bright and willing youngsters; it is fair to say they've won!
